Introduction

Access to timely, accurate, and relevant data is essential to improving quality, mitigating costs, and promoting transparency and efficiency in the health care delivery system. A valuable source of data can be found in health care claims but it is currently collected by a variety of government entities in various formats and levels of completeness. Using its broad authority to collect health care data ("without limitation") under M.G.L. c. 118G, § 6 and 6A, the Center for Health Information and Analysis (CHIA) has adopted regulations to create a comprehensive all payer claims database (APCD) with medical, pharmacy, and dental claims as well as provider, product, and member eligibility information derived from fully-insured, self-insured, Medicare, Medicaid and Supplemental Policy data. CHIA is a clearinghouse for comprehensive quality and cost information to ensure consumers, employers, insurers, and government have the data necessary to make prudent health care purchasing decisions.

To facilitate communication and collaboration, CHIA maintains a dedicated MA APCD website (www.mass.gov/chia/apcd) with resources that currently include the submission and release regulations, Administrative Bulletins, the technical submission guide with examples, and support documentation. These resources will be periodically updated with materials and the CHIA staff will continue to work with all affected submitters to ensure full compliance with the regulation.

While CHIA is committed to establishing and maintaining an APCD that promotes transparency, improves health care quality, and mitigates health care costs, we welcome your ongoing suggestions for revising reporting requirements that facilitate our shared goal of administrative simplification. If you have any questions regarding the regulations or technical specifications we encourage you to utilize the online resources and reach out to our staff for any further questions.

Thank you for your partnership with CHIA on the all payer claims database.

114.5 CMR 21.00 – Health Care Claims

114.5 CMR 21.00 governs the reporting requirements for Health Care Payers to submit data and information to CHIA in accordance with M.G.L. c. 118G, § 6. The regulation establishes the data submission requirements for health care payers to submit information concerning the costs and utilization of health care in Massachusetts. CHIA will collect data essential for the continued monitoring of health care cost trends, minimize the duplication of data submissions by payers to state entities, and to promote administrative simplification among state entities in Massachusetts.

Health care data and information submitted by Health Care Payers to CHIA is not a public record. No public disclosure of any health plan information or data shall be made unless specifically authorized under 114.5 CMR 21.00 or 114.5 CMR 22.00.

Acronyms Frequently Used

APCD – All-Payer Claims Database

CHIA – Center for Health Information and Analysis

CSO – Computer Services Organization

DBA – Delegated Benefit Administrator

DBM – Dental Benefit Manager

DOI – Division of Insurance

GIC – Group Insurance Commission

ID – Identification; Identifier

MA APCD – Massachusetts' All-Payer Claims Database

PBM – Pharmacy Benefit Manager

QA – Quality Assurance

RA – Risk Adjustment; Risk Adjuster

TME / RP – Total Medical Expense / Relative Pricing

TPA – Third Party Administrator

The File Types:

DC – Dental Claims

MC – Medical Claims

ME – Member Eligibility

PC – Pharmacy Claims

PR – Product File

PV – Provider File

The APCD Monthly Member Eligibility File

As part of the MA APCD filings, all submitters will be required to submit an ME file. The Center for Health Information and Analysis (CHIA) recognizes that any change to this file type creates a programming burden. Under the auspice of Administrative Simplification, it was determined prudent to add elements to this file type so that current supplemental files and/or reports can be eliminated and create a single-source collection point.

Every month an ME File is required. It should contain a rolling 24 month period of all eligibilities, benefits, attributes and dates of enrollment/disenrollment. This information provides the MA APCD with the necessary information to link claims to their corresponding eligibility segments.

The ME Detail Records are defined as one record per member, per begin / end period for a given Product (another filing type of the MA APCD). Multiple records for “Member + Product” may exist and begin and end eligibility dates can overlap when there is a shift in Product assignment, a carve-out benefit is being reported, or PCP assignment is adjusted multiple time per month. Attribute changes such as PCP selections should be reported to capture necessary information for claim QA and clinical management of the member.

The new elements that have been added for Total Medical Expense (TME), Division of Insurance (DOI), and Risk Adjustment Reporting are detailed below in Types of Data Collected in Member Eligibility File. Please review both the elements and rational for collect to understand the reporting requirements.

Below are additional details and clarifications:

Specification Question	Clarification	Rationale
What is the frequency of submission?	Monthly, but representing persons over a rolling 24 month period with open and or closed segments of eligibility.	CHIA requires monthly Eligibility files to capture the attributes necessary for matching to the various Claims Files coming in on the same schedule.
What is the format of the file?	Each submission must start with a Header Record and end with a Trailer Record to define the contents of the data within the submission. Each Detail Record must contain 18 elements in an asterisk delimited format.	The Header and Trailer Records help to determine period-specific editing and create an intake control for quality. The asterisk is an inherited symbol from previous filings that submitters had already coded their systems to compile for previous version of the MA APCD.

What does each row in a file represents?	Each row, or Detail Record, contains the information of a unique Eligibility + Product that a carrier or Third-Party maintains to process Member claims.	CHIA recognizes that information at this detailed level is necessary for aggregation and reporting utilization and aids with maintaining Master Member IDs to insure privacy of data.
There appears to be similar fields on eligibility that are also collected on the claims file. Can you clarify?	Many of the elements in the files use similar semantics and a few are exact duplicates. CHIA is concerned with the details presented in the ME File regardless of the information presented on the Claims Files.	CHIA is required to standardize and analyze information on Members and the variations of Eligibility. The like elements on the Claim Records mirrors what is typically billed by providers and aids with QA work when analyzing covered services, in- vs. out-of-network and/or Third Party Administrator attributes.
Member's date of death is not specifically tracked by the business. Why is this being collected on this file?	The intent of this was to aid with ending a Member's Eligibility regardless of place of expiration.	CHIA realizes that different submitters deal with this information in different ways. Report on the ME File when known understanding that Medical Claims Files can also report Member's Date of Death. This information will be used in Master Member ID attribution activity.
There are a number of elements in the file layout that do not apply to us. Is there some mechanism to bypass the reporting of these?	The individual elements all have a threshold setting that will aid submitters in meeting the reporting requirements	CHIA realizes that the current format does not fit all submitters. The variance process allows for submitters to address any inability to meet threshold requirements. It is also important to note if your submitter type or OrgID assignment is required to submit the element of concern.

What might cause a member to have more than one eligibility record per month?	A member can or will have more than one eligibility when they are enrolled in more than one product, or have a break in eligibility, or multiple, active PCP assignments within a reporting period.	Accurate enrollment data is needed to calculate member months by product and by provider. Additionally, the attributes of these memberships drive much of the QA that is performed on the Claim Lines that are received for these ME Detail Records.
If claims are processed by a third-party administrator, who is responsible for submitting the data and how should the data be submitted?	In instances where more than one entity administers a health plan, the health care carrier and third-party administrators are responsible for submitting data according to the specifications and format defined in the Submission Guides.	CHIA's objective is to create a comprehensive APCD that must include data from all health care Carriers, Pharmacy Benefit Managers, and/or Third-Party Administrators.
My company is not a Risk Holder so many elements don't apply. How should this be dealt with; via the Variance Request?	When a submission is coming from a non-Risk Holder (TPA, Claims Processor, PBM) several elements may not be available to report. By identifying the type of business in ME134 – APCD ID Code, the MA APCD will be able to relax some of the intake edits based upon the business.	CHIA is required to differentiate varying lines of business to satisfy many report requests. The ability to parse eligibility data into standard categories will remove the burden of requesting supplemental files from submitters to identify the various types.

Types of Data collected in Member's Eligibility File

Subscriber / Member Information

Both subscriber and member information is collected in the file. Although the focus is primarily on the member to maintain Master Member IDs and link to claims when submitted, information regarding the subscriber is necessary as well. The MA APCD is now collecting elements directly related to the Subscriber (who may be the Member as well) and the policy they have through an employer, the premium paid, benefit levels and industry codes.

Non-Massachusetts Resident

The regulation requires private health care payers to submit Medical Claims and Encounter Data for "all Massachusetts resident members, and all members of a Massachusetts employer group including those who reside outside of Massachusetts."

CHIA will not require payers submitting claims and encounter data on behalf of an employer group to submit claims data for employees who reside outside of Massachusetts, unless the payer is required by contract with the Group Insurance Commission to submit paid claims and encounter data for all Massachusetts residents, and all members of a Massachusetts employer group including those who reside outside of Massachusetts.

Demographics

CHIA collects birth date and gender information on each Subscriber and Member in order to meet reporting and analysis requirements of the MA APCD. This information is also useful with matching algorithms and quality measures for claims.

Coverage Indicators

CHIA continues to collect coverage indicator flags to determine if a member has medical, dental, pharmacy, behavioral health, vision and / or lab coverage. These elements may be compared against the Product file and will be helpful in understanding benefit design.

Provider Identifiers

CHIA has made a conscious decision to collect numerous identifiers that may be associated with a provider. The data in submitted in these provider based elements will be used by CHIA when analyzing data across carriers.

Dates

In addition to the start and end dates for enrollment period and PCP assignment period, CHIA is now collecting Total Medical Expense Health Status Adjustment Score Date Period as well as the date that the tool was run for scores. See ME124 through ME130 for the details on the TME Data Element collection effort.

New Data Elements

Under Administrative Simplification, CHIA has worked with Division of Insurance, The Connector, Group Insurance Commission and our own internal departments to identify new elements to be added to the MA APCD Dataset to satisfy that goal. Below is a list of those elements, the submitter type expected to report them, the reason and the data expected within the element.

HD009 – APCD Version #; *all submitters, required for setting intake edits*

This new Header element requires the version number of the MA APCD Specifications that a submitter is using to compile their ME File. Current version is 3.0, prior version is 2.1

ME119 – Tobacco Use Flag; *all submitters, aids with reporting analyses*

This element utilizes the MA APCD pre-defined lookup table with the values for Yes, No, Other, Unknown and Not Applicable. It's reporting will be used for Risk Adjustment calculation.

ME120 – Actuarial Value; *all Risk holding entities, to aid with Risk Adjustment*

This element is one of the few Decimal elements in MA APCD and should report the Risk Holders actuarial value assigned to the member in 0.0000 format. It's reporting will be used for Risk Adjustment calculation. Non-Risk Holders may report values here.

ME121 – Metal Level; *all Risk holding entities, to aid with Risk Adjustment*

This element utilizes a new MA APCD pre-defined lookup table with the values for Bronze, Silver, Gold, Platinum and Unknown/Not Applicable. It is to aid with Risk Adjustment calculations by assigning this level of benefit. Non-Risk Holders may report a Metal Level or Unknown/Not Applicable here.

ME122 – Coinsurance Maximum %; *all Risk holding entities, to aid with Risk Adjustment*

This element utilizes a new MA APCD pre-defined lookup table with the values to report maximum coinsurance that a member would pay in a given line of eligibility. The values report a range of 10, 20, 30, 40, 50, 75, 80, 90% and Unknown. Non-Risk Holders may report a Coinsurance Maximum or Unknown here.

ME123 – Monthly Premium; *all Risk holding entities, to aid with DOI Reporting and Risk Adjustment*

This element is to report the monthly premium the subscriber / member pays towards their family eligibilities or sole eligibility. Reporting 0 (zero) here indicates that the subscriber / member has no financial responsibility towards the premium. Non-Risk Holders may report a value here or 0 (zero).

ME124 thru ME130 all pertain to Total Medical Expense (TME) Reporting and are required of those submitters that are currently responsible to report TME Data to CHIA. Please review each of these elements to understand the requirements and conditions applied. Non-TME reporters may report information in these elements, but must follow the submission guidelines for content and quality.

To identify if your organization is a TME / RP reporter and required to submit the additional data elements, please review the list of TME Filing OrgIDs on the TME / RP websites:

<http://www.mass.gov/chia/researcher/health-care-delivery/hcf-data-resources/total-medical-expenses-relative-price/list-of-payers-required-to-report-data.html>

ME131 – Payment Arrangement Type; *all TME Reporters, required of TME reporting*

This element utilizes an existing MA APCD pre-defined lookup table from the Claim Submission Guides with an additional value added for Bundled Payment to satisfy a payment category reporting aggregate. Non-TME Reporters may a Payment Arrangement Type here.

ME132 – Employer Contribution; *all Risk holding entities, to aid with Cost Trends Reporting*

This element is to report the employer's contribution towards a Subscriber's / Member's policy. The element is conditional upon Employment Status. Non-Risk Holding entities may report a value here.

ME133 – GIC ID; *all GIC Contracted Carriers, to aid with GIC reporting requirements*

This element is to report the GIC assigned identifier from each member. The presence of this identifier is dependent upon the value reported in ME134 and sets the requirement for reporting data in ME067 through ME070. Non-GIC reporters SHOULD NOT report a value here as this will invoke other data elements that may not be applicable to a line of business.

ME134 – APCD ID Code; *all APCD submitters, to aid with data requirements and edits*

The element utilizes a new MA APCD pre-defined lookup table with the values for identifying a line of eligibility being categorized as a Fully Insured Group Enrollee, Self-Insured Group Enrollee, GIC Group Enrollee, MassHealth MCO Enrollee, Supplement Policy Enrollee or Unknown. The value selected here will invoke various edits that apply to that enrollee category in tandem with the CHIA assigned OrgID. Please note selecting an incorrect category will invoke edits on elements not typically populated by submitter type and may create a Failed File for not meeting base thresholds. Additionally, OrgIDs that submit Unknown 100% of the time but have been identified as one of the other values will inadvertently Fail their file.

CHIA is committed to working with all submitters and their technical teams to ensure compliance with applicable laws and regulations. CHIA will continue to provide support through technical assistance calls and resources available on the CHIA website, www.mass.gov/chia

File Guideline and Layout

Legend

1. File: Identifies the file per element as well as the Header and Trailer Records that repeat on all MA APCD File Types. Headers and Trailers are Mandatory as a whole, with just a few elements allowing situational reporting.
2. Col: Identifies the column the data resides in when reported
3. Elmt: This is the number of the element in regards to the file type
4. Date Element Name: Provides identification of basic data required
5. Date Modified: Identifies the last date that an element was adjusted
6. Type: Defines the data as Decimal, Integer, Numeric or Text. Additional information provided for identification, e.g., Date Period – Integer
7. Type Description: Used to group like-items together for quick identification
8. Format / Length: Defines both the reporting length and element min/max requirements. See below:
 - a. char[n] – this is a fixed length element of [n] characters, cannot report below or above [n]. This can be any type of data, but is governed by the type listed for the element, Text vs. Numeric.
 - b. varchar[n] – this is a variable length field of max [n] characters, cannot report above [n]. This can be any type of data, but is governed by the type listed for the element, Text vs. Numeric.
 - c. int[n] – this is a fixed type and length element of [n] for numeric reporting only. This cannot be anything but numeric with no decimal points or leading zeros.

The plus/minus symbol (**±**) in front on any of the Formats above indicate that a negative can be submitted in the element under specific conditions. **Example:** When the Claim Line Type (MC138) = V (void) or B (backout) then certain claim values can be negative.

9. Description: Short description that defines the data expected in the element
10. Element Submission Guideline: Provides detailed information regarding the data required as well as constraints, exceptions and examples.
11. Condition: Provides the condition for reporting the given data
12. %: Provides the base percentage that the MA APCD is expecting in volume of data in regards to condition requirements.
13. Cat: Provides the category or tiering of elements and reporting margins where applicable.

Elements that are highlighted indicate that a MA APCD lookup table is present and contains valid values expected in the element. In very few cases, there is a combination of a MA APCD lookup table and an External Code Source or Carrier Defined Table, these maintain the highlight.

It is important to note that Type, Format/Length, Condition, Threshold and Category are considered as a suite of requirements that the intake edits are built around to insure compliance, continuity and quality. This insures that the data can be standardized at other levels for greater understanding of healthcare utilization.
